I have set a imageview to be a clickable imageview. I want to change the width of the imageview when clicked on that imageview. How can i do that? A: `PopupWindow popUp = new PopupWindow(imageView.getContext()); popUp.setWidth(200); //or whatever you want popUp.setHeight(200); popUp.setBackgroundDrawable(new BitmapDrawable()); popUp.showAsDropDown(RelativeLayout);` Solving a mystery: how do neuroscientists find time to eat? Many studies focus on the effects of eating on the function of the brain; yet, little is known about the impact of appetite and metabolism on cognition. We asked what factors contribute to the limited caloric intake seen in neuroscientists. Forty neuroscientists from five countries were recruited via e-mail to participate in an online survey. Each participant was asked to estimate their intake of calories over the previous month, including four categories: 1) at home, 2) at work, 3) during laboratory visits, and 4) before and after lab visits. Another question was to estimate average energy expenditure during the previous month, including time spent at home, work, and the laboratory. To examine eating practices, participants were asked

---

what percentage of their daily caloric intake comes from fast food, junk food, or “healthy” foods. They were also asked how many hours they had spent eating meals, eating snacks, and going to the bathroom
