
Portraiture Plugin For Pho Windows X64 Pro Activation

Portraiture For Photoshop no lags Portraiture for photoshop for mac i hope that will help you and more would come. Thanks. For more details please have a look on the following link. Portraiture For Photoshop Portraiture For Photoshop Tutorial i hope that will help you and more would come. Thanks. Q: Django FileField formatter not working properly I'm using a FileField in a Django form. I want to check for the file extension on the server side. class MyForm(forms.Form): files = forms.FileField() def clean(self): if file.endswith('.gz'): # do something... else: raise forms.ValidationError(u'Invalid file name.') The above code throws a ValueError. It seems that the files.endswith() method doesn't work properly. Can anyone help? A: Does your server side handle gzipped files? If not, you'll need to unzip the file in the view. Alternatively, you can set the 'pre_clean' method in your form to unzip the file on server-side, def pre_clean(self): # unzip the file here That being said, I can't imagine how this could be useful in the first place. A: You need to make sure that the files have been gzipped. def clean(self): # Check that the file has been gzipped if os.path.exists(self.cleaned_data.get('file')): with gzip.open(self.cleaned_data.get('file'), 'rb') as f: # do something with the file contents... # (e.g. save to a file) #.... # then set the new
