Increase Patch is a free application that can update applications and data that require byte-level changes. It reduces update file size by 90-99% and features a full update log. Using Increase Patch is very easy: it's just 3 easy steps to get started. Step 1: Enter the desired update file to be updated, and choose the directory in which the update file will be created. Step 2: Check the parameters of the update process and configure them,

according to the desired settings.

Step 3: Start Increase Patch and wait for the update process to complete. Increase Patch will produce an update log that includes all the settings used in the update process.

Increase Patch Verdict:

Increase Patch is an easy-to-use application that can update applications and data that require byte-level changes. The application reduces update file size by 90-99% and features a full update log

Increasing a file size by almost 90% to be written to a USB device

by USB mass storage driver, an update file which size approximately 900KB or more per minute. The operation of increasing, shrinking, and patch a file can be performed several times, but if the USB driver is not utilized for data storage, the update of your USB device will be completed faster. Update file type - changes to the Windows Registry Update file type: Increases file size by approx. 90% to be written to the USB device by USB mass storage driver. Increase application size by

90% or more - an update file which size approximately 900KB or more per minute. Increasing a file size by almost 90% to be written to a USB device by USB mass storage driver, an update file which size approximately 900KB or more per minute. The operation of increasing, shrinking, and patch a file can be performed several times, but if the USB driver is not utilized for data storage, the update of your USB device will be completed faster. Virtual drive application (Windows XP / 7) -

Changes to the Windows registry
The application is used to quickly change the size of the application or to increase the size of a virtual drive to be compatible with the size of a USB device. How to use it:
Increase virtual drive size by 90% or more: The first step is to choose the update file to be changed and to the type of change to be made.
Select the type of change that is required (to increase the size of the virtual drive or to reduce the
