It is a jolly app with a ton of features, but most notably with the ability to get to know you and especially your drawings better. Even more important is the fact that the application is fully functional and can be obtained for free. Interface Right from the beginning, you can tell you have to deal with a professionally developed app. The appearance and smoothness of the interface are astounding, especially since we're talking about an app offered for free. The options, as well as the idea behind the app, are two of the strongest elements recommending this app as a must-have. Drawing Studio should not be regarded as a child exclusive app. It can be used by adults just as easily. The idea Regardless of all other aspects, the concept of this application is what truly makes it fascinating. The main idea is that the app can learn the way you draw certain doodles or scribbles. This means that, in a way, the AI becomes more knowledgeable when it comes to your person. Adding to this is the fact that the same AI can teach you how to draw based on what it observes when you set your imagination free. There is truly something interesting in establishing a relationship between a human and his PC, and Drawing Studio brings that to the forefront. No matter how you look at the situation, Drawing Studio is one of those rare, quite unique applications.
