AutoCAD is used to create 2D and 3D computer-aided design models and drawings for architecture, engineering, and construction. For architectural drawings, AutoCAD is used primarily to create construction documentation. For 3D drawings, AutoCAD is used primarily to create industrial design drawings. The most common uses for AutoCAD are in the fields of architecture and engineering. AutoCAD History AutoCAD's

development was funded in-part by the U.S. Department of Energy (DOE) and United States National Science Foundation (NSF). On November 3, 1982, Autodesk began a ten-year development effort to create AutoCAD. The initial AutoCAD development team consisted of the following people: Ken Emson Ken Emson was Autodesk's first software developer. He joined Autodesk in 1971 and was involved in the development of many Autodesk applications including AutoCAD,

Multimedia Builder, System Director, and CurveFlex. Steve Shelnutt Steve Shelnutt worked at Autodesk for nearly 15 years. After leaving Autodesk in 1987, he worked as a consultant on Autodesk's AutoCAD for the next 6 years. Duane Stein Duane Stein joined Autodesk in 1988 as a technical illustrator. He then became the primary developer of the AutoCAD Civil Architecture and Urban Design Applications. Alan Pearce Alan Pearce was the primary designer of the AutoCAD

Modeler. He developed the HVEC (Historic Victorian, Eclectic, and Contemporary) theme for AutoCAD in 1995, the Dynamic Component Model in 2000, and Scene Paint and Model Lighting in 2005. Arthur DeBolt (Karen) Barry Arthur DeBolt (Karen) Barry joined Autodesk in 1993. During her time at Autodesk, she worked on the AutoCAD Architectural Desktop Product Group in the features and requirements department. She is currently the Director of Autodesk's Design

Solutions Group for Architecture, Engineering and Construction. Steve Myers Steve Myers was a principal consultant for AutoCAD for the first decade of its development. Michael Goroff Michael Goroff has worked at Autodesk since 2002, primarily as a technical architect on the AutoCAD project. He joined the team in 2007. Peter Deutsch Peter Deutsch joined Aut

the UI dialogs User Preferences – user-specific settings, preferences, database records, file management, etc. User preferences are stored in the registry, in the following path: HKEY_CURRENT_USER\Software\Autodesk\AutoCAD More than 100 button and menu items are available. Autodesk Exchange also supplies help for AutoCAD users, to increase productivity, with an AutoCAD support site and AutoCAD forums. Command line The command-line version of AutoCAD is built on the DOS

command line. It consists of four basic commands: acad (AutoCAD; opens AutoCAD) acat (AutoCAD application; opens acad) acadedit (AutoCAD command line editor; opens acad) crontab -e (shell command editor for editing crontab) Use AutoCAD is used by many types of people, including architects, engineers, technicians, students and hobbyists. It is used for 2D drafting, as well as designing 3D projects. It is used to create and edit electronic technical drawing files, such as BOMs,

manufacturing documentation, assembly and maintenance manuals, etc. Basic operations AutoCAD provides a number of basic operations: Creating simple 2D drawings Viewing 2D drawings in a window Editing 2D drawings Creating 3D models (optional) Rotating, scaling and translating 2D drawings Viewing and editing 3D drawings Texting Text drawing Linework drawing See also CadSoft 3ds Max AutoCAD Architecture AutoCAD Electrical AutoCAD Civil 3D AutoCAD

Q: web2py SQL Injection Question I'm using web2py's SQL Injection security as part of a website for a school project, and I'm having a little trouble following some of the steps. I have to create an account, and then have the user click on the 'log in' button (to create an account) in order to proceed, and I have two different SQL Injection problems that I have encountered. First, if I try to log in with these two SQL Injection strings: sql = "SELECT username, password

FROM users WHERE username=' or '1='" cursor.execute(sql) I get the following error: Internal Server Error: /account/login/ [SQL] SELECT username, password FROM users WHERE username=' or '1='" [SQL] SELECT username, password FROM users WHERE username=' or '1='" [SQL] SELECT username, password FROM users WHERE username=' or '1='" I'm not sure how to correct this SQL Injection. I'm also not sure how the 'log in' button that would actually allow the user to go

to the next page should work. My second SQL Injection issue is the following: mysql.connect

Import feedback directly from a paper or PDF that's not too big for a pen drive. Using the AutoCAD 2D Web Client, open your markups in the clipboard as a link, and then drag and drop the link onto a web page for quick review and feedback. When you import a link to a drawing, you can send it

directly to the person to whom it was shared, or add the link to your My Inbox for later review. In addition to paper or PDFs, you can import other types of markup formats, such as XML (eXtensible Markup Language) and SVG (Scalable Vector Graphics). Drag and drop feedback in a canvas that's as large as you need. Drag a paper or PDF document, or use a pen, stylus, or other drawing instrument. With feedback on your canvas, you can modify your drawing in real time. (video: 1:15

min.) Track changes and edits in a drawing as you review feedback. Use annotation to make notes, add notes to the drawing, or assign comments to a region. When a comment or annotation is saved, it is added to the history, and you can switch between different versions of your drawing with a single click. Draw and make comments directly on your drawing. Use the mouse or a drawing instrument to enter notes, or directly on a region. (video: 1:48 min.) Annotate with your finger or a drawing

instrument, and add notes with a single click. Comment on a path or text, or add a comment to a block. Use AutoCAD to record an AR, VR, or MR experience, view a video, or easily attach a file. With the new AutoCAD 2023 integrated web browser, you can record a web page or a website and attach it directly to your drawing. Connect to a drawing and sync your drawing with the updated information from a website or database. (video: 2:08 min.) When you connect to a drawing and sync with an external

database, the drawing is updated with the information in the database, so you don't have to wait for a re-run. (video: 2:27 min.) Using the new AutoCAD 2D Web Client, you can share your markups or open markups from other people. With links, you can send drawings
